COLLEGE VISION

To emerge as a premier institution in the field of technical education and research in the state and as a home for holistic development of the students and contribute to the advancement of society and the region.

COLLEGE MISSION

To provide high quality technical education through a creative balance of academic and industry oriented learning; to create an inspiring environment of scholarship and research; to instill high levels of academic and professional discipline; and to establish standards that inculcate ethical and moral values that contribute to growth in career and development of society in general.

VISION OF THE DEPARTMENT

To be a premier Department in the region in the field of Information Technology through academic excellence and research that enable graduates to meet the challenges of industry and society

MISSION OF THE DEPARTMENT

- To Provide dynamic teaching-learning environment to make the students industry ready and advancement in career;
- ✤ To inculcate professional and leadership quality for better employability and entrepreneurship;
- To make high quality professional with moral and ethical values suitable for industry and society

PROGRAM EDUCATIONAL OBJECTIVES (PEOs)

PEO1: Solve real world problems through effective professional skills in Information Technology industry and academic research.

PEO2: Analyze and develop applications in Information Technology domain and adapt to changing technology trends with continuous learning.

PEO3: Practice the profession in society with ethical and moral values.

PROGRAM OUTCOMES (POs)

PO1: Engineering Knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

PO2: Problem Analysis: Identify, formulate, research literature, and analyze complex engineering problems reaching substantiated conclusions using the first principles of mathematics, natural sciences, and engineering sciences.

PO3: Design/Development of Solutions: Design solutions for complex engineering problems and system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, society, and environmental considerations.

PO4: Conduct Investigations of Complex Problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

PO5: Modern Tool Usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

PO6: The Engineer and Society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.

PO7: Environment and Sustainability: Understand the impact of the professional engineering solutions in society and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

PO8: Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.

PO9: Individual and Team Work: Function effectively as an individual, and as a member or leader in diverse teams, and in multi-disciplinary settings.

PO10: Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

PO11: Project Management and Finance: Demonstrate knowledge and understanding of the

engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multi-disciplinary environments.

PO12: Life-long Learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

PROGRAM SPECIFIC OUTCOMES (PSOs)

PSO1: Design and develop software in the area of relevance under realistic constraints. **PSO2:** Adopt new and fast emerging technologies in the field of Information Technology. Website: www.jntuk.edu.in Email: dap@jntuk.edu.in

Phone: 0884-2300991

Course Description

Artificial intelligence (**AI**) is a field of study in which computers mimics human brain. how to realize the intelligent human behaviors on a computer. The main research topics in **AI** include: problem solving, reasoning, knowledge representations, applications of search strategies and problem reductions using mathematical logic concepts. Building, rule-based expert systems and application of expert system is another arena of AI.

Course Objectives

The main objectives of this course are the student will be able to:

- 1. Know the methodology of Problem solving.
- 2. Implement the basic AI algorithms
- 3. Design and carry out the empirical evolution of different algorithms on a problem formalization.

Course Outcomes

Students are able to

| CO No's | COs | Level |
|---------|--|-------|
| CO1 | Understand Fundamental concepts of Artificial Intelligence. | L2 |
| CO2 | Apply various logic concepts and search strategies in representing knowledge for various problems. | L3 |
| CO3 | Analyze the applications of search strategies and problem reductions. | L4 |
| C04 | Evaluate the knowledge representations in Artificial Intelligence and fuzzy logic systems | L6 |

UNIT WISE Important Questions

UNIT - I

Short Answer Questions:

- 1. Define AI.
- 2. What are the advantages & disadvantages of AI?
- 3. List the goals of AI.

Essay Questions:

- 1. List out various applications of AI.
- 2. Explain the major characteristics of ELIZA.
- 3. Categorize intelligent systems based on their working principle.
- 4. Describe the components of AI program.
- 5. Elaborate the implementation of Tic-Tac-Toe game with 3 approaches.

6. Briefly explain about the history of AI. 7. Describe the foundations of AI. 8. Explain the current trends in AI.

UNIT – II

Short Answer Questions:

1. Write any two advantages and disadvantages of exhaustive searches.

- 2. Write the disadvantages of Hill Climbing approach.
- 3. Write the importance of heuristic function to solve an AI problem.
- 4. Define production system.
- 5. Define State Space Search. Explain 8-puzzle problem.
- 6. Differentiate between forward chaining & backward chaining.
- 7. List the two-player perfect information games.

Essay Questions:

- 1. Write the productions involved in solving a Water-Jug Problem.
- 2. Elaborate the working of A* Algorithm with an example.
- 3. Write the importance of Constrain Satisfaction in AI.
- 4. Trace Best First Search algorithm with an example. 2
- 5. Differentiate between exhaustive search and heuristic search.
- 6. Explain the procedure to implement Hill Climbing.
- 7. Write the procedure to implement Beam Search.
- 8. Explain Alpha-Beta pruning in game playing.
- 9. Discuss the implementation of all the exhaustive searches with examples.
- 10. Elaborate the significance of AO* Algorithm.
- 11. Explain MINIMAX algorithm in AI.
- 12. List & explain the characteristics of problem.
- 13. Explain Problem Reduction (AND-OR graph) in AI.
- 14. Explain about the Nim Game problem.

UNIT – III

Short Answer Questions:

- 1. Differentiate between Predicate and Proportional logic.
- 2. List out rules used in Semantic Tableau System.
- 3. Define Propositional Logic.
- 4. Define Predicate Logic.
- 5. Define Resolution.

Essay Questions:

- 1. Trace the Resolution Algorithm by taking an example.
- 2. Compare and Contrast Axiomatic System with Semantic Tableau.
- 3. Discuss the procedure of converting WFF to the clause form.

4. Consider the following sentences: Marcus was a man Marcus was a Pompeian Marcus was born in 40 AD All men are mortal All Pompeians died the Volcano erupted in 79 AD No mortal lives for more than 150 years

- (i) Convert the above WFF'S to clause form.
- (ii) Answer the question "Is Marcus dead now?" in two different ways.
- 5. Discuss the significance of Natural Deduction System with an example. 3
- 6. Explain Propositional Calculus (PC).
- 7. Explain Propositional Logic (PL).
- 8. Explain the Unification Algorithm.

$\mathbf{UNIT} - \mathbf{IV}$

Short Answer Questions:

- 1. List the approaches to Knowledge Representation (KR).
- 2. Define Conceptual Dependency (CD).
- 3. Define Script.
- 4. Define Frame.
- 5. List three primitives used in Conceptual Dependency with their usability.
- 6. Write the Conceptual Dependency representations for the following statements (i) John Ran (ii) John is tall.
- 7. Write the importance of Conceptual Dependency in representing knowledge.
- 8. Write the advantages and disadvantages of Semantic Networks.
- 9. List the 6 cases in Case Grammars.

Essay Questions:

- 1. Discuss the procedure to represent knowledge using Semantic Network.
- 2. Explain extended Semantic Networks for Knowledge Representation.

3. Write about Conceptual Dependency theory. How it will be used for Knowledge Representation?

- 4. How do you represent visiting a restaurant in the form of a Script? Explain.
- 5. Write the significance of using CYC in capturing human commonsense database.
- 6. How inheritance is represented in Semantic Net? Explain the same with an example.
- 7. How knowledge representation can be done using Frames? Explain.

$\mathbf{UNIT} - \mathbf{V}$

Short Answer Questions:

- 1. Define Expert System?
- 2. List the characteristics of an Expert System.
- 3. List out the applications of an expert system.
- 4. What are the advantages & disadvantages of Expert System?

Essay Questions:

- 1. How Truth Maintenance System (TMS) is used for general problem solving?
- 2. Explain various phases involved in designing an Expert System.
- 3. Differentiate Expert Systems versus Traditional Systems.
- 4. Explain the architecture of Expert System (or) Rule based Expert System.
- 5. Explain the Blackboard System. 6. Explain Expert System building tools.
